General Information

The General Building Manual briefly covers major topics of the State exam including Concrete, Carpentry and Roofing, Masonry, Electrical, Plumbing, and HVAC. The manual also contains summaries from the California Building Code, California Electrical Code, California Plumbing Code, and the California Mechanical Code. The last section of the General Building Manual covers the Health and Safety Orders.

The Math Review Lecture explains the math formulas in the first part of the General Building Manual. The General Building Lectures discuss the general knowledge portions of the manual. The Health and Safety Lecture covers the Health and Safety Orders at the end of the manual. The General Building Review Questions Lecture covers the General Building Review Questions in the back of the manual.

Be sure that you study all of the practice exams. It is important to read and understand each question, and read every word of the explanations. It is necessary to learn the principles behind the question because the State's questions may be worded differently.

The Online Practice Exams are available with most kits. A key-code will be included just inside the cover of the written manual(s). There are three different methods of studying using the online practice exams: Non-graded quizzes, flashcards, and exam simulations. Once activated, subscriptions are good for up to 365 days. Extensions may be purchased for an additional fee.
