C-9 Update (Most current questions)

General Information

The C-9 Manual briefly covers the major topics of the State exam including Tools and Materials, Preparation, Attaching Drywall to Wood or Metal Framing, Semisolid and Solid Partitions, Metal Door Framing, Joint and Surface Treatments, Repairs in Drywall, Fire Resistance, Sound Control, and a Glossary of Terms. The C-9 Manual also includes the Health and Safety Orders and C-9 Review Questions.

The Math Review Lecture covers the math formulas in the first part of the C-9 Manual. The C-9 Lecture covers the topics addressed in the manual specific to the C-9 trade exam. The Health and Safety Lecture covers the Health and Safety Orders at the end of the C-9 Manual. The C-9 Review Questions Lecture covers the C-9 Review Questions in the back of the manual.

Be sure that you study all of the practice exams. It is important to read and understand each question and read every word of the explanations. It is necessary to learn the principles behind the question because the State's questions may be worded differently.

The Online Practice Exams are available with most kits. A key-code will be included just inside the cover of the written manual(s). There are three different methods of studying using the online practice exams: Non-graded quizzes, flashcards, and exam simulations. Once activated, subscriptions are good for up to 365 days. Extensions may be purchased for an additional fee.
