ASB Test 1 (100 Questions)

ASB Test 2 (100 Questions)

ASB Update (Most current questions)

### General Information

The Asbestos Abatement Manual briefly covers the major topics of the State exam including Assessments, Sampling, Lab Testing, Abatement Methods, Start-Up Sequence, Containment, Negative Air Systems, Clean-Up Sequence, Small Jobs, Asbestos-Related Diseases, and Respirators. The manual also contains summaries of Asbestos Related laws.

The Math Review Lecture covers the math formulas in the first part of the ASB Manual. The Health and Safety Lecture covers the Health and Safety Orders at the end of the ASB Manual.

Be sure that you study all of the practice exams. It is important to read and understand each question and read every word of the explanations. It is necessary to learn the principles behind the question because the State's questions may be worded differently.

The Online Practice Exams are available with most kits. A key-code will be included just inside the cover of the written manual(s). There are three different methods of studying using the online practice exams: Non-graded quizzes, flashcards, and exam simulations. Once activated, subscriptions are good for up to 365 days. Extensions may be purchased for an additional fee.
